My Dear Sir

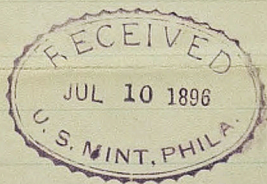

Among the effects of my brother who has just died is a complete set of U S Coins in a velvet case, of the issue of 1868, from \$20. gold down to 1 cent bronze. They are in same condition as when first issued from mint, in fact they are in the case made especially for them. Will you kindly let me know if they are worth more than their face value, and also will you refer me to some party, if you know of such person, who would likely to want them?

Very truly

Has a complete set of *Albums*
 of 1868 issue *Gold & Silver*,
 back to know of they amount
 more than four value of who
 could likely purchase them,

A full proof set of the U.S coins of 1868
~~are~~^{is} worth about \$51.00. We don't know of
any collector that would purchase. Coin-
dealers would not pay so much as the
above value.
